WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

REPORT NO. 177
PAGE 1

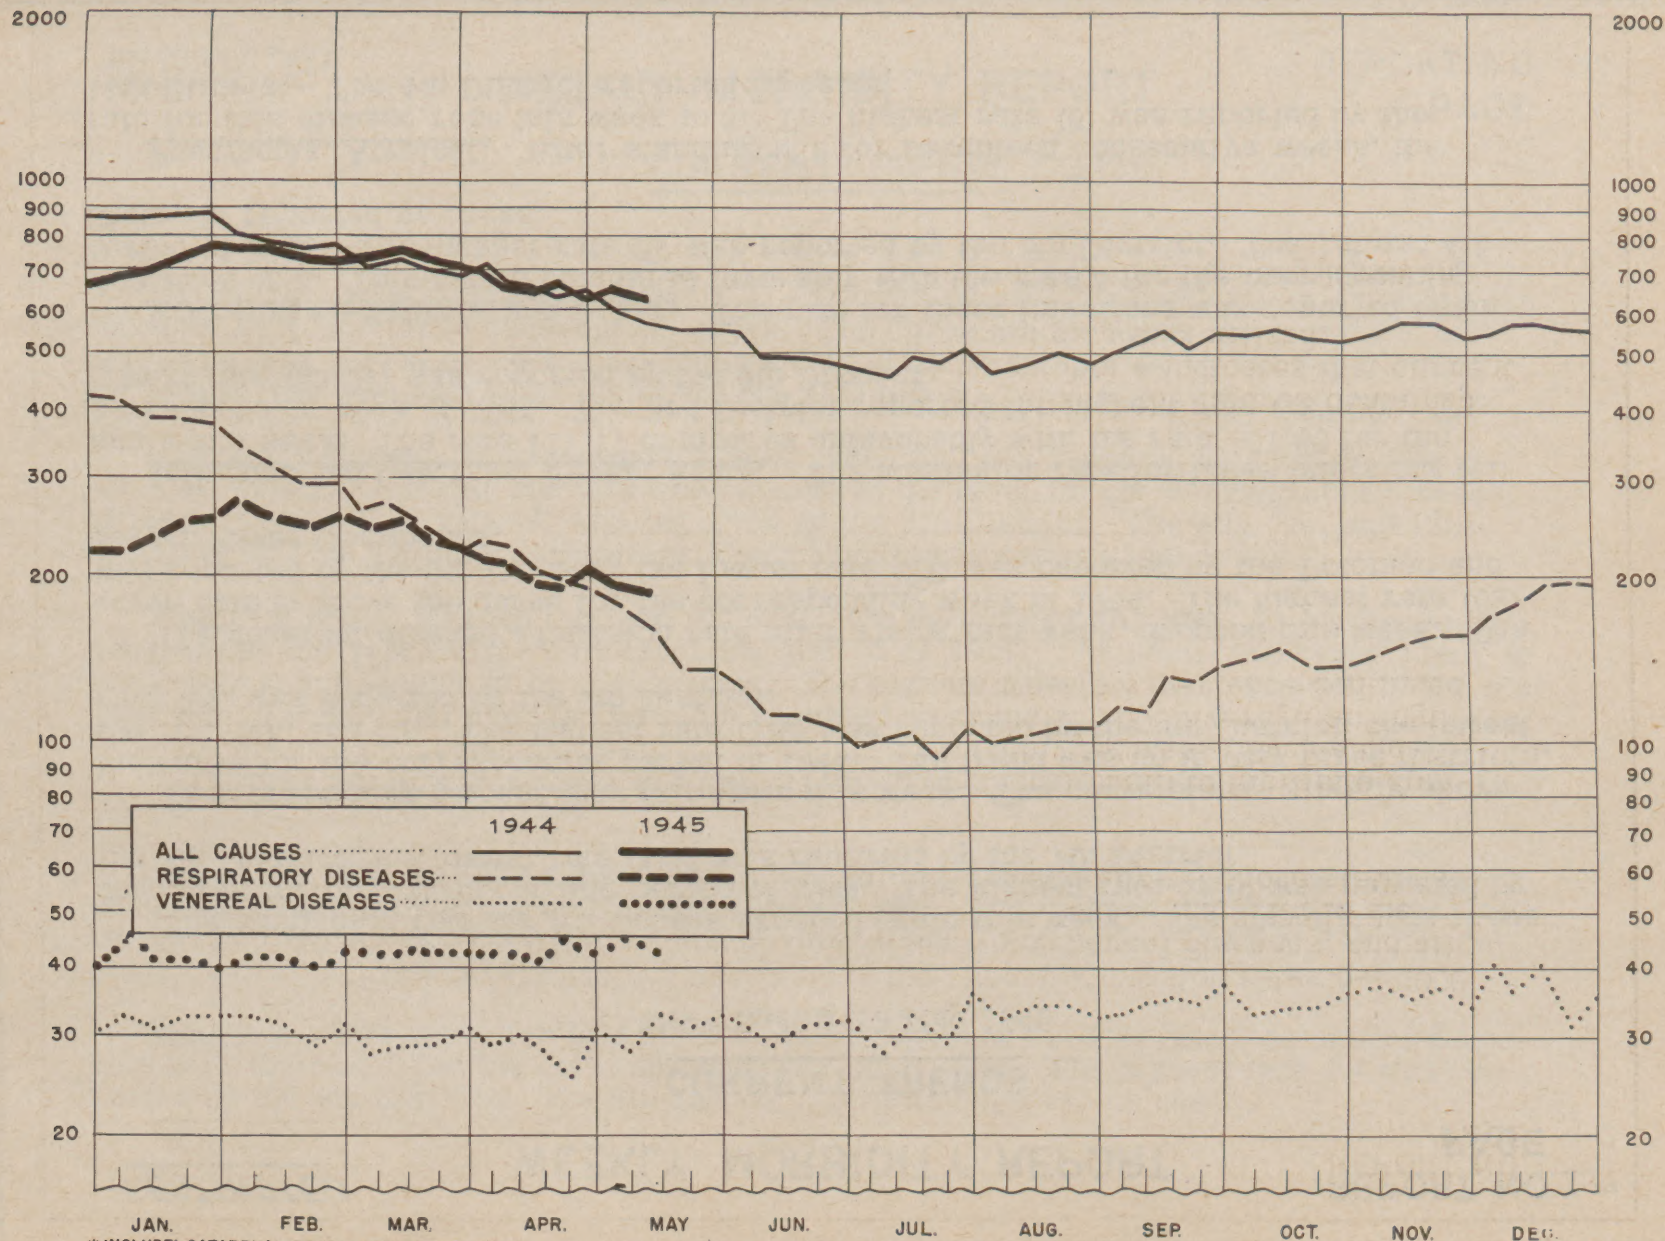

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE & PHARYNGITIS, ACUTE

CURRENT TRENDS

Week Ending 19 May 1945

The admission rate for All Causes dropped again this week. The curve stands above the curve for the corresponding period of 1944. The highest rate (868) was reported by the 9th District; the lowest rate (452) was reported by the 7th District.

The respiratory disease rate fell again this week. The curve stands slightly above the curve for the corresponding period of 1944. The trend was up in only three districts, the 3rd, 5th, and 6th. The highest rate (319) was reported by the 9th District; the lowest rate (84) was reported by the 7th District.

The venereal disease admission rate after rising last week, dropped this week. The curve stands above the curve for the corresponding week of 1944. The highest rate (62) was reported by the 8th District; the lowest rate (27) was reported by the Potomac and Severn River Commands.

Influenza and Catarrhal Fever, Acute. The admission rate for these infections fell again this week. The rate 117.17 compares unfavorably with the rate 101.60 for the corresponding week of 1944. The 3rd District reported the highest rate (227.00). The lowest rate (53.37) was reported by the 8th District.

Pneumonia--Broncho and Lobar. The rate for these infections was reported again this week at 2. This rate 2 compares favorably with the rate 3 for the corresponding period of 1944. The highest rate (5) was reported by the 5th District. The 1st and 4th Districts reported no cases.

Pneumonia, Atypical. After standing at 2 for seventeen consecutive weeks, the rate for this disease rose this week to 3. The highest rate (6) was reported by the 11th District. The 4th District reported no cases.

CURRENT TRENDS CONTD.

Tonsillitis and Pharyngitis, Acute. The admission rate for these infections has been reported at 63 for three consecutive weeks. The curve stands above the curve for the corresponding period of 1944. The highest rate (168) was reported by the 9th District; the lowest rate (16) was reported by the 7th District.

Rheumatic Fever. The rheumatic fever rate has been reported at 2 for three consecutive weeks. The rate for this week stands at the level for the corresponding week of 1944. The highest rate (7) was reported by the 9th District. The 4th, 7th, and 13th Districts and the Potomac and Severn River Commands reported no cases.

Scarlet Fever. Though the rate for this disease dropped this week, it continues to stand above the rate for the corresponding period of 1944. The trend was upward only in the Potomac and Severn River Commands. The highest rate (60) was reported by the 9th District. The 4th, 6th, and 7th Districts reported no cases.

Cerebrospinal Fever, Meningococcic. The trend for this disease is downward. Only the 5th District reported cases.

Malaria. The malaria rate was reported again this week at 3. This rate stands above the rate 2 for the corresponding week of 1944. The highest rate (5) was reported by the 7th District and the Potomac and Severn River Commands. The 3rd District reported the lowest rate (0.67).

Measles. The curve for this disease stands again at 2. The rate 2 compares favorably with the rate 8 for the corresponding period of 1944. The highest rate (7) was reported by the 9th District. The 4th and 6th Districts reported no cases.
